WHY WE LEAD IN SETTING THE NEW STYLE IN BULBS

The name and reputation of the firm of Max Schling is as well known in Holland as it is in our own country. Here we are known as the firm to depend upon for the best in bulb novelties and standard varieties, while in Holland we are known as the firm to reach with new and outstanding varieties to be introduced.

As a result we come up year after year with the finest varieties for discriminating and meticulous gardeners. This year's list of novelties have been grown and tested by us, have been exhibited, and have won top honors in many big league flower shows.

TREE PEONY-FLOWERED TULIPS

(See front cover.)

Not to be confused with ordinary Double Late Tulips, this **new** strain has impressed us as the outstanding Tulip introduction of the century.
Never before have we observed flowers of such size and substance, and never before have we seen such gorgeous color combinations.

This new race of Tulips is unsurpassed as a large, impressive cut flower.

NOTES ON FORCING TULIPS

All Tulips in this book marked "f" are satisfactory for forcing.

Single and Double Early Tulips can be brought into bloom as early as February 1st. Triumphs about February 10th, and the later forcing varieties about March 1st.

Tulips should be potted in rich soil no later than November 1st for best results. Bury them in a well drained pit and cover with 12 to 18 inches of loose leaves, straw, etc. A cold, moist cellar or cave that does not go below 32 degrees is also very satisfactory. Allow six weeks before blooming date for bringing into house temperature. When growing, the bulbs require copious quantities of water, night temperature of 50 to 55 degrees, and a daytime temperature of 70 degrees maximum.

NEW RARE and EXOTIC PARROT TULIPS

At New Low Prices

No Tulip has captivated the public as much as the new and improved types of Parrot Tulips. These new types are noted for their strong stems and unusual substance of flower, so that while we recommend them more as cut flowers, they nevertheless are virile enough for garden planting, particularly as accent plants.

Varieties marked "c" are available in Trial Collection.

Cultural Notes on Daffodils

New bulbs are rarely ready before late September. Plant as early as possible for best results, although late planting is satisfactory. All varieties are hardy; in northern climates a mulch is assurance against freezing.

Plant bulbs so that tip is covered 3 to 4 inches. Use Bone Meal or Superphosphate, avoid all manures when planting, and top dress the plantings in early March with commercial fertilizer. For long stems water the beds copiously whenever possible.

For naturalizing effects plant bulbs irregularly. Cast the bulbs and plant in the position that they have fallen.

OUR FAMOUS OREGON TRAIL MIXTURE

Of Daffodils and Narcissi for Naturalizing

Year after year we pridefully offer this terrific value of which we have sold over 15,000,000 bulbs. Year after year we gratefully observe the increase in orders and reorders. The careful selection and blending of varieties makes this mixture a "LONG TIME INVESTMENT IN BEAUTY." 50 for \$4.00; 100 for \$7.25; 1000 for \$70.00; 2000 for \$132.50.

Note on "High Priced" Bulbs

It is a known fact that good Daffodils increase in your garden faster than prices come down. Thus, for example, one bulb of Scarlet Leader at \$2.50 four years ago has now increased to twelve with a current value of \$12.00. Dividends of this nature, plus years of enjoyment make "Good Daffodils a fine long time investment."

THE QUALITY OF OUR OREGON TRAIL MIXTURE

The quality of our Oregon Trail mixture for naturalizing cannot be compared with any naturalizing mixtures offered at lower prices or even equal prices. Our mixture is made up of full size bulbs that average in weight from 8 to 10 lbs. per 100 bulbs. We are acquainted with other mixtures that weigh as little as 2 or 3 lbs. per 100 bulbs. We consider our mixture the finest value in Narcissus ever offered.

Notes on Hyacinth Culture

Hyacinths for outdoor growing should be planted so that the bulb tip is covered no more than 3 inches. Planting dates vary with geographical locations, but they may be planted safely until December 1st in most localities. Bulbs for forcing can be planted until November 15th. Use general procedure (Culture Bulletin on request) as for all hardy bulbs. Hyacinths in glasses should be started in cool basement until heavy root growth develops. Move to bright airy room.

SCHLING'S NEW PATENTED VARIETIES

Plant September to November

These new varieties represent a new race of Freesias. The flowers are immense, twice the size of ordinary varieties; the colors are intense; they are strong, virile growers, and the flowers are borne in immense trusses. None of these improvements have minimized the fragrance of the old type. In fact, the delicate and delightful aroma seems to be enhanced in these new varieties.

Apple Blossom. Delicate pink. (U. S. Plant Pat. No. 486.)

Bronze Giant. Combination of copper and bronze.

Giant Cream. Enormous cream-yellow, distinct orange-yellow throat; very tall, vigorous. Delightful fragrance.

Giant Lavender. Lively deep lavender, white throat.

King of the Yellows. (U. S. Plant Pat. No. 488.)

Maryon. Beautiful mauve. (U. S. Plant Pat. No. 32.)

Schling's Famous Lily-of-the-Valley Pips for Indoor Forcing

READ THIS PLAN CAREFULLY

There is nothing in the line of indoor forcing bulbs that can give the all-around satisfaction that one derives from our forcing Valley. Deprived of these since 1941, the American public demonstrated their love for this flower by the overwhelming demand we encountered when offering them for the first time in 1946. Reports have been enthusiastic.

Ready for delivery September 15th-April 1st. All pips delivered from September to December 1st will force readily in from 18 to 21 days. These are storage pips held over from last year. If you want a bowl of your own grown flowers on the THANKSGIVING or CHRISTMAS table, place your order sufficiently in advance to insure delivery.

After January 1st we will ship freshly harvested pips that will take from 28 to 35 days to bring into bloom. This growing period narrows down to 21 to 25 days as the season progresses.

	12	25	100
Price	\$2.75	\$5.25	\$19.50

You can save considerably by placing your order AT ONE TIME FOR A WHOLE SEASON'S SUPPLY. We will be glad to make split shipments as you direct, and your initial order can be made at the best quantity price. No shipments of less than 12 pips.

All shipments sent parcel post SPECIAL DELIVERY to insure prompt arrival.

MAX SCHLING'S PREPARED BULB FIBER. Unexcelled for growing all indoor bulbs and particularly our Lily-of-the-Valley without mess. Any container can be utilized with this material inasmuch as drainage is not required. Can be used over and over. Qt., 25c; 4 qts., 75c; pk., \$1.35.

Lily-of-the-Valley

Schling's Famous Danish Forcing Strain

GLORIOSA Rothschildiana. (Illustrated.) A most exotic flower easily grown in the greenhouse or conservatory room. It loves to climb and support should be given the plant early. Use a good sandy loam or half sand and humus. Plant should be dried off as soon as it has flowered, and replanted outdoors for summer bloom. Bulbs are fine reproducers. Supply limited. Large Flowering Bulbs, \$1.25 each; Jumbo Bulbs, \$1.75 each.

Cyclamen Corms

(Illustrated)

In response to the tremendous demand for our prize winning Holland-Grown Cyclamen Corms which have been the show-stopper of the International Flower Show, we are again offering corms of this magnificent strain. We feel certain that these will produce plants of real exhibition quality.

These will be shipped in September, and should be grown at a temperature not exceeding 55 degrees at night, and as cool as possible by day. Do not consider growing them if these temperature requirements cannot be met. Full cultural directions with each order.

Offered in Brilliant Red, Crimson, Pure White, White with Red Eye, Salmon, Lavender and Mixed.

Price: \$1.00 each; 6 for \$5.00.

Notes on Lily Planting

All varieties of Lilies listed on these pages should be planted at a depth of 8 to 12 inches with the exception of L. Auratum and L. Candidum. Experience has shown that the optimum planting depth for these latter is 2 to 3 inches.

Certain varieties of Lilies, Speciosum Rubrum among them, mature so late as to become available in late November. In severe climates to prevent the ground from freezing, we recommend that the soil be prepared and mulched heavily. Then, when the bulbs arrive, the mulch may be removed and the bulbs planted without difficulty.

Schling's Reputation Builder Grass Seed Mixtures

In a great measure the reputation of a seed house depends upon the quality of the lawn seed it offers, since this is an item purchased by anyone who has any ground at all, and because of the wide variance in the quality of the mixtures offered.

Regardless of brand name, the important feature of a good mixture is that it contains heavy plump seeds from selected grass stocks. Careful blending plays its part in the compounding of a lawn seed mixture. We pride ourselves on the super-quality of our mixtures which have established so great a reputation in the past twenty-five years.
